

Sustainability Initiatives

2017: CERTIFIED SUSTAINABLE

Implementing ongoing sustainability efforts and enhancements, including:

- Water conservation
- Energy efficiency
- Soil Health, and much more

IN PROGRESS: CERTIFIED ORGANIC

- All 335 acres of our estate vineyards are farmed utilizing synthetic, chemical-free and climate-smart farming practices
- Plan to achieve Certified Organic by 2025

100% Carbon-Free
Electricity

100% Recycled Water and
Green Waste

Offset 100% of Carbon Emissions
from DTC Wine Shipments

ADDITIONAL SUSTAINABILITY ENHANCEMENTS

- Investment in Monarch electric tractor for use in our estate vineyards – one of only the first ten tractors produced
- Investment in soil health by increasing the production of locally sourced green waste compost
- Adapting trellises to better protect the grapes from the temperature extremes and increase resiliency
- Selecting rootstocks that require less water and fertilizer to ensure a quality crop year after year
- Incorporation of wood chip mulch to add carbon and micronutrients to our soils
